Romaa Amarnnanii

Product Manager & Strategist | Building B2B Enterprise Products
that Drive ROI & Adoption
Bengaluru, Karnataka, India

Experience

Climes

2 years 1 month

System Architect / Product Strategist
January 2026 - Present (9 months)
Greater Bengaluru Area

I bridge the gap between business strategy and technical execution for our carbon accounting platform.

What I do:

- Own product architecture—translating market needs into scalable, standardized systems
- Build rigorous emissions methodologies across Scope 1, 2 & 3
- Assist the development team to standardize calculation logic and emission factors for consistency and auditability
- Drive end-to-end customer project delivery

Turning climate complexity into working solutions that meet real-world reporting requirements.

Marketing Lead

September 2024 - January 2026 (1 year 5 months)

Climes is India's leading climate finance company (backed by Peak XV/ Sequoia), facilitating finance to flow confidently into building and regenerating carbon sinks in the Global South. Our focus on regenerative agriculture and agroforestry seeks to keep smallholder farmers and communities at the centre of finance flows. With 80k+ farmers onboard, 250k+ acres under management, and 200k credits in the pipeline, our goal is to develop high-quality carbon removal built on high-quality incentives.
